Carbon Accounting for Climate and Sustainability

22nd - 23rd June 2026 - Dusit Thani Hotel, Dubai - U.A.E.

Course Overview

The IFRS Foundation was recently restructured into two pillars, namely the existing International Accounting Standards Board (IASB) and the newly formed International Sustainability Standards Board (ISSB). The ISSB will focus on sustainability and climate change and issued two new Standards IFRS S1 and IFRS S2 that will change the face of financial reporting for ever. This is a two day seminar that is based on these new developments of the ISSB and will focus on the reporting on sustainability and climate change.

The seminar is unique as it also highlights the link between Sustainability and Environment, Social and Governance (ESG). The seminar also focuses on the quantitative carbon accounting and disclosing the carbon footprint of a corporation through the measurement of direct, or indirect, upstream, or downstream greenhouse gas (GHG) emissions in three scopes.

Practical Foucs

The seminar is wrapped around real life scenarios, practical examples and illustrations of sustainability and climate change issues. This will also assist delegates in the calculating and measuring of Greenhouse Gas emissions to disclose the information in the annual reports.

Key Learning Outcomes

By the end of the seminar, candidates will be able to:

ISSB and Reporting
- Gain knowledge on the new developments of the International Sustainability Standards Board (ISSB).
- Understand the new IFRS S1 and IFRS S2 Standards that will change financial reporting.
- Report and disclose sustainability and climate change-related information in the annual reports.

Sustainability and ESG
- Understand the principles of sustainability and the effect of climate change.
- Link Environment, Social, and Governance (ESG) with sustainability and climate change.
- Understand the background and three pillars of ESG.

Carbon Accounting and GHG Emissions
- Understand the importance of carbon and the carbon cycle.
- Understand the concepts of physical and financial carbon accounting.
- Be able to calculate Greenhouse Gas (GHG) emissions across three scopes. Understand the definition and importance of the three scopes of direct and indirect, upstream, and downstream GHG emissions.
- Understand the use of emission factors (EFs) and the Global Warming Potential (GWP) in carbon emission calculations.

Practical Application
- Be assisted in calculating and measuring Greenhouse Gas emissions to disclose the information in the annual reports.
- Understand how to apply the principles through real-life scenarios, practical examples, and illustrations.

Why You Should Attend?

The seminar will enable attendees to:

- Understand New Standards: Gain knowledge on the new developments of the ISSB , including the finalized standards IFRS S1 (General Requirements for Disclosure) and IFRS S2 (Climate-related Disclosures).
- Link ESG and Sustainability: Connect Environment, Social, and Governance (ESG) with sustainability and climate change.
- Master Carbon Accounting: Be able to calculate GHG emissions across three scopes (direct, or indirect, upstream, or downstream).

Course Facilitator

Hentie Van Wyk

Programme Director Accounts

Testimonials

- It was a good IFRS course, refresher & also provide updates with examples & exercises. **Sohar Port & Freezones**.
- It was a good course, refresher & also provide updates with examples & exersises – Exe Manager Finance & Support Services Very Good Lecture, Prof. Hentie has a wealth of knowledge. Hentie is a very knowledgeable person & the presentation is very interesting & active. **Dubai Duty Free**.
- I found the whole training very fruitful & comfortable in all arrangements. The IFRS course was excellent. **Gulf Stabilizers Industries.**
- Hentie is very engaging and easy to follow. Department of Labour.
- Hentie is very good and always offers informative training sessions. **Limpopo Provincial Treasury**
- The guy knows his stuff. Please invite him for all accounting courses. Hentie is more than excellent. Electronic Media Network Limited.
- Clear and easy to understand, Hentie uses good examples. Assmang Chrome
- It was an informative course, the facilitator, Hentie was clear. **Mvela Management**
- He gives good sound knowledge of the IFRS – very good in interpreting the standards and gives assistance very well. North West Parks and Tourism Board.
- Course Trainer, Hentie is up to date with industry developments as well as current standards and this has been very important in individual situation in assessing applicability. **Western Platinum Refinery (Lonmin)**

Carbon Accounting for Climate and Sustainability

22nd - 23rd June 2026 - Dusit Thani Hotel, Dubai - U.A.E.

Day 1

Scope, Important terminology and abbreviations

Session 1: Background to sustainability
- Sustainability risks/opportunities arise interactions
- Sustainability and climate change
- Who will force change?
- Need forreporting on sustainability

Session 2: Building blocks of sustainability
- Sustainably development goals
- Importance of sustainability goals
- Sustainability is a management function
- Managing sustainability
- Sustainability: The new approach

Session 3: The link ESG and sustainability
- How did ESG originated?
- Background to ESG
- Linking ESG with sustainability goals
- Three pillars of ESG
- Environment + Social + Governance = Sustainability
- ESG focus = sustainability focus
- Questions and answers

Session 4: The link between climate change and sustainability
- Importance of climate change and sustainability risks
- Climate change and global warming
- What is the importance of carbon?
- Reservoirs of carbon
- The carbon cycle and explained
- The risk of the greenhouse effect
- What causes global warming and climate change?
- Most important greenhouse gases and industries responsible
- The impact of climate change
- Behaviour of customers and impact on business
- What can corporates do?
- Concept of circular economy

Session 5: Why account for Greenhouse gases?
- Time to change
- To measure is the starting point
- Why account for Carbon/GHGs?
- Benefits of controlling emissions
- Focus areas
- What is carbon accounting?

Session 6: Physical and financial carbon accounting The value chain
- Value chain: Starting point of carbon accounting
- Value chain: Direct vs indirect emissions
- Defining the three scopes
- Upstream and downstream emissions
- The three scopes and the importance thereof
- The importance of GHG Inventory
- Reduce regulate and offset

Session 7: Measurement of GHG emissions
- Carbon emission calculations
- The basic calculation and the use of emission factors (EFs)
- Quantification of EFs and different measurements
- The use of the Global Warming Potential (GWP)
- GHG vs Global Warming Potential
- Revised basic calculation
- Example with Global Warming Potential
- Sources of EFS: Single source vs multiple sources
- Direct vs Indirect emissions in three scopes
- Simplified examples of carbon emissions calculations

Day 2

Relevant reporting frameworks

Session 1: Evolution of sustainability and climate reporting frameworks
- Developments of reporting frameworks
- Carbon disclosure project (CDP)
- Climate disclosure standards board (CDSB)
- Global reporting initiative (GRI)
- International integrated reporting council / Value reporting framework (IIRC/VRF)
- Sustainability accounting standards board (SASB)
- What now with all the frameworks?
- IFRS Foundation and structure

Session 2: The standards of the International Sustainability Standards Board (ISSB)
- The future of the ISSB, the future Value Reporting Foundation (VRF), and Climate disclosure standards board (CDSB)
- Objective of the ISSB
- The Technical Readiness Working Group (TRWG)
- General Requirements for Disclosure of Sustainability-related Financial Information (ISSB: S1, standard finalised 26/6/2023)
- Climate-related Disclosures (ISSB: S2, standard finalised 26/6/2023)
- New developments on ISSB S2
- Examples including Marks and Spencer, Jaguar and Emirates
- Impact of climate change on other financial reporting standards and going concern

Session 3: The role of the IFRS Foundation in future
- Future role of the IFRS foundation
- Involvement of IFRS foundation through the Value Reporting Foundation (VRF)
- Future of the SASB standards
- Future of the integrated reporting framework
- Future of Climate Disclosure Standards Board (CDSB)

Programme Schedule

08:30 am – 09:00 am	Registration & Coffee Break
09:00 am – 11:00 am	Course
11:00 am – 11:30 am	Networking & Coffee Break
11:30 am – 01:00 pm	Course
01:00 pm – 02:00 pm	Networking & Luncheon
02:00 pm – 03:00 pm	Course
03:00 pm – 03:30 pm	Networking Break
03:30 pm – 05:00 pm	Course

Who Should Attend?

The masterclass is designed for experienced financial, sustainability, and risk management professionals including:
- **C Suite & Senior Leaders**: Chief Financial Officers (CFOs), Chief Sustainability Officers (CSOs), and Financial Directors.
- **Accounting & Reporting Professionals**: Accountants, Financial Reporting Managers, and Internal Auditors.
- **Strategy & Compliance Roles**: ESG/Sustainability Directors, Compliance Managers, and Risk Management Professionals.
